

Priv8RSS Reader

FOR IPHONE AND IPAD

Read the news without the news *reading you.*

An RSS reader with no web view, and AI that runs on your iPhone (Apple Intelligence devices).

— ABOUT

Priv8RSS renders articles natively from the feed. There's no web view, so no web page or script ever runs inside the app.

Its AI features (Smart Feeds sorting, summaries, merged stories, a Daily Briefing, and answers with citations across your feeds) run on your device with Apple Intelligence. No article text is sent anywhere.

Read-aloud and Focus mode are built to be easier to read for anyone who finds a block of text hard going. Focus mode shows one word at a time, in step with the spoken voice.

Who it's for. RSS loyalists tired of acquisitions and subscriptions, people who want AI on their news without sending their news to someone's AI, and readers who find long text hard going.
